

AHT Cooling Systems, headquartered in Rottenmann, Austria, and with numerous subsidiaries abroad, is one of the leading international companies in the field of commercial refrigeration and deep-freezing for the food industry. We are looking for a Supply Chain Manager (m/f/d) to join our SCM team with immediate effect.

Supply Chain Manager (m/f/d)

YOUR TASKS

- Planning, monitoring, controlling and completion of supply chain projects with project manager responsibility at national and international level**
- Identification of optimisation potentials of processes and value streams along the supply chain**
- Monitoring, controlling and further development of critical supply chain key indicators and pushing improvement activities**
- Analysis and strategic development of international logistics processes**

YOUR PROFIL

- Bachelor / Matura with several years of practical work experience in a comparable position**
- Experience in project management**
- Communication skills, solution-oriented work and ability to work in a team**
- Confident handling of ERP systems (SAP is an advantage)**
- Know-how and enjoy process optimisation and finding suitable solutions**
- You are flexible, precise and assertive**
- Very good English and German skills**

WE OFFER

Your place of work is a top modern office in Rottenmann in Upper Styria with a generous home office arrangement. As an attractive employer, we also offer you optimal support during induction, internal and external training opportunities, a flexible working time model as well as a strong team and a pleasant working atmosphere. With us, the collective agreement of the electrical and electronics industry applies, which is basically already above an average salary in Austria. The annual gross salary for this position is at least € 50,000. We will agree your actual salary with you in a personal interview.

Apply with your CV and meaningful excerpts from previous projects that you have implemented independently! We look forward to getting to know you!
